Term 4

'Plants'

By the end of the block, children should know –

How plants grow

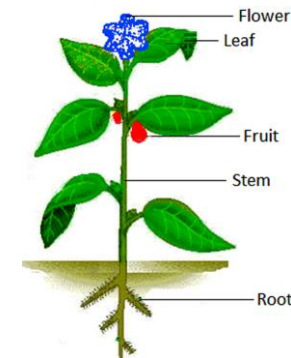

- Plants need light, water, soil and warmth to grow.
- Plants use light to make their own food.
- Plants have seeds, roots, stems and leaves.

The types of plants

- Plants spread their seeds in different ways in order to reproduce.
- Some plants drop their leaves every year; they are called deciduous.
- Some plants keep their leaves all year; they are called evergreen.

The origin of foods

- We eat some types of plants. For example: root– carrots, stem celery, leaves-lettuce, seeds– peas.
- We eat food grown on farms or in orchards.
- Some food we eat comes from other countries e.g. Bananas
